THE MYSTERIOUS MAGNA CARTA

As year 5 and 6 walked into the eerie room, they felt excited. The dark walls made it a magical experience as a single light lit up the scripture. The sheepskin sat in a glass box, on top of a white podium. The original text is written in Latin, in ink made from sap. The dim light preserves this writing, as the ink would fade if it was too bright. A translated version of the text sits outside. Sat next to the Magna Carta is a replica of the stamp because the original was lost. Sophia in year 5 said: "I really like the Magna Carta, and I learnt some interesting facts like the marble was polished with sheepskin." Next, the year groups had to give their complaints to King John, which was an interesting experience for them all. He shouted at them, and they were not allowed to sit down until he did. "He was snappy and grouchy, especially towards the women. They were rated worse than the peasants!" Harper in year 6 explained. Overall, both classes were very pleased after the trip because they learnt a lot about the history of the Magna Carta.
