

Clayton-le-Woods Church of England Primary School

Outdoor Learning

Long term overview and statement of intent

Together we inspire one another to live life to its fullness, rooted and built up in Christ, so that every member of our school community can learn, develop and flourish, to live in the world as

the unique individuals God created us to be.

Intent of the teaching and learning of Outdoor Learning

Our idyllic setting allows us to create a wealth of opportunities to seek renewal in the outdoor world. From an early age the children begin to explore our expansive world and start to understand the world around them. Outdoor Learning sessions, which are set out in the long-term overview, allow the children to question, explore and experiment within the world through a hands-on approach in a safe and stimulating environment. The children participate in a breath of activities to develop substantive and disciplinary concepts enabling them to flourish as a unique individual throughout their time at Clayton-le-Woods.

Implementation of the teaching and learning of Outdoor Learning

From our youngest children in pre-school to our eldest in Year 6, the children are encouraged to have a hands-on explorative approach to Outdoor Learning. Our sessions are shaped by our school vision, which enable all children, regardless of background, ability and or additional needs, to flourish to become unique individuals.

Our disciplinary and substantive concepts are revisited each year, allowing the children to build on their prior knowledge and skills whilst challenging themselves within a safe environment. The child-led nature of outdoor learning, and the focus on social development, allows outdoor learning to be a subject that engages children in a manner that is hard to imitate in the classroom, creating new opportunities for learning and development.

We use adaptive teaching approaches, taking into account recommendations from external agencies, across the curriculum. Approaches such as chunking learning into smaller steps, frequent repetition of learning ensures all pupils, including those with SEND, are able to access the learning and gain granular knowledge within the subject to the same high-standard as their peers, providing a flexible, ambitious and robust curriculum for all. In addition, our Outdoor Learning sessions have also been linked to our wider curriculum where we feel the learning can be enhanced through our outdoor areas, either in our own expansive grounds of woodlands and gardens or in Cuerden Valley Park.

Impact of the teaching and learning of Outdoor Learning

After the implementation of this robust outdoor learning curriculum, children at Clayton-le-Woods will become more well-rounded and prepared learners and individuals. They will not only be more confident and resilient learners, but they will also become more caring and supportive peers due to the heavy focus the curriculum places on understanding and generating empathy. This will allow children will become more able to regulate their social, mental, emotional, and spiritual health meaning the children to perform better in collaborative learning and tasks, arming them with the skills necessary to improve themselves in their schooling career and life in the wider world.

As children grow in confidence in their abilities in the outdoor environment, they will begin to understand, assess and manage their own risk and safety. This will allow the children to become more independent and show them that life comes with not only risk but also rewards. It also teaches them what their own limits are and that they can push through them. They will see that sometimes we don't always get the desired result the first time but that doesn't make us a failure, it helps us to grow, forcing us to try again in a different way. It encourages problem solving logical thinking and self-reflection and evaluation but most of all the pupils will see that mistakes aren't failures; they are a part of learning, that they are, ultimately, human.

Mrs Z Burt

September 2023

How we live out our British and Christian Values in Outdoor Learning				
Democracy	The Rule of Law and Forgiveness	Individual Liberty and Courage	Mutual Respect, Respect and Friendship	Tolerance of those of different faiths and Beliefs, Thankfulness and Truthfulness
In Outdoor Learning, we have respect for our fellow pupils and encourage everyone to have the confidence to express their ideas and opinions regarding environmental issues such as pollution, environmental issues and conservation of water.	In Outdoor Learning pupils examine different codes for protecting the environment and the world in which we live and consider the value of the rule of law where all people are equal before the law. Children are given the opportunities to explore and evaluate the outcomes of issues such as that surrounding climate change and how we can make a difference to this at a local and global level. Outdoor learning can have a positive impact upon children's behaviour when following the code for learning in the environment and understand the value and need for this code. Children recognise right and wrong; understand consequences; investigate moral and ethical issues and offer reasoned views. They demonstrate forgiveness when working as a team, understanding where mistakes have been made and how we can learn from them.	Children will explore their own individual liberty in terms of exploring their own environment and surrounding areas having the freedom to pursue any further interests they may have at a more informal level. At Clayton-le-Woods CEP, we believe that all children have the right to experience the unique and special nature of being outdoors and experience the freedom of being surrounded by the natural environment and experience the good quality, active learning that being in the environment brings. Outdoor learning contributes towards creating independent learners with high self-esteem and self-sufficiency where they have the courage to take on new challenges.	Mutual respect is taught and given when children are expressing their opinions and beliefs about different localities of the environment. Children are taught and encouraged to show respect to each other's beliefs, feelings and opinions by giving each child a forum to share these on with the expectation that these must be listened to encouraging friendship amongst all children. Children will discuss what it means to be British and learn how to question and challenge stereotypes respecting other opinions. Outdoor Learning can create a sense of belonging in the school and wider community and promote community involvement, renewing children's ownership and responsibility. When children are closely involved in developing and managing their outdoor environment, it helps foster attitudes of stewardship, responsibility and a sense of cohesion.	Children consider questions regarding environmental issues such as pollution and the human impact upon the world and understand that different people have different opinions and beliefs regarding this. Children have the opportunity to explore how areas have changed and how the diverse needs in society has changed with them. Children learn to be thankful for cultural influences in their environment and participate in cultural opportunities. They are taught to understand, accept, respect and celebrate diversity and be truthful with their own understanding and experiences.
